Rage 2: Project 2 will be developed by Avalanche Studios, the makers of the award winning original game Rage. Project 2 is an add-on content pack for the original game. This means that you don't need the original game to be able to play Project 2. This is important for a couple of reasons: 1. Avalanche Studios will have more time and resources to dedicate to the Project 2 content. 2. You can play Project 2 with out having the original game installed and without having to repurchase it. Project 2 is an expansion of the original game that will add new levels,

items, enemies and enemies and weapons. The first level will be completed in April and the end of July. The project is currently on track to meet its funding goal within 45 days. This means that it could potentially surpass the original \$500,000 funding goal. Avalanche Studios is currently one of the few game studios that are following the trend of crowdfunding video games. Here is a clip from an interview done with Billy Pidgeon, Producer at Avalanche Studios. There has been an overwhelming response to the original game and Avalanche Studios plans on capitalizing on that. Currently there is a stretch goal for a “split screen co-op”. If this goes through the project will include Xbox Play Anywhere support. This means that you will be able to purchase and play Project 2 on both Xbox One and Xbox 360. I am personally really excited about the Project 2 add-on and can't wait to play it. If you too are excited about the Project 2 add-on, please share this post with your friends and family.Q: How can I use a different config file for my app?
